

JUNE 1982

This documentation package consists of two loose-leaf binders and combines the EXORset User's Guides for hardware and software into a comprehensive unit. In relation to previous editions, the areas where specific technical content has changed are summarized below:

- Schematics of the Main Controller and Floppy Disk Controller Boards.
- Spare Part Reference List.
- Maintenance Manual for BASF 6106/08 LSI.
- Manual for 12" CRT and revised manual for 9" CRT. (Applicable to either EXORset 100 or 33).
- Power Supply Description.
- Back Panel Connector Mounts.
- Address Map Diagram.

The software documentation has been altered from previous editions as follows:

The XDOS Manual has been updated to reflect the enhancements incorporated in Version 4.0 (Previously these were described in a supplementary manual).

The BASICM manual has been revised to conform with Version 3.00. (Previously described in a file BASCNEWS.SA on the master diskette). These include an enhanced CLOSE command and a revision of Chapter 13's discussion of compiler operation. The BASICM supplementary manual has been classified as an addendum and the pages renumbered.

The PLOT Tiny Graphics Package description has been provided with a table of contents, numbered section headings and pagination.
